To all POW-MIA families in the United States and to the League of Families;

My name is Ross Milosevic, I am an Australian Security/Intelligence consultant that has been working in Iraq for the last four and half years. I have worked for a number of respected Risk Management company's for the last 11 years providing security and intelligence services for a number of international corporate clients and foreign Governments, where terrorism and security warrents personal protection and corporate intelligence services.

My contact details are as follows: My personal email in Australia: [rmilosevic@bigpond.com](mailto:rmilosevic@bigpond.com)

I am writing this public letter to notify every family that there is a young man passing himself off as a CIA (patsy) operative who was working in Cambodia under the pretense of tracking and infiltrating Al Qaeda elements in Cambodia. He implied that he had precise POW-MIA information on key POWs lost during the Vietnam war that are still living in Laos, who he says that he medically treated, when asked to go there by his CIA Cambodian contact.

\* I must be very frank and let everyone know, that I can assure all the families that the information that this man has provided is totally inaccurate, false and incoherent. There are four recorded audio tapes that are in the possession of the family I visited in Arizona, that can be verified as being this man's testimony of fiction.

This young man who I interviewed for one and half days in Arizona, on the 13th and 14th of December 2007, was recorded and was witnessed by two POW-MIA families. The name that he used, was *Richard*, although he also used a Arabic name, that I did not and could not confirm or verify either, as the person had "NO" identification on him at all, so he said!!!! He implied that the CIA was tracking him and manipulating him for their own use, so he could provide for his family after coming from Iraq in 1995 or 1996, I recall.

His life story is somewhat far fetched and into the bizzar, that it could have come streight out of Hollywood set or a Bourne Indenity movie. In any case, I must inform as many families as possible that this person is a fraud and a scam artist, who is trying to finance himself via POW-MIA families to send him back to Laos / Cambodia to free the POWs that he so called treated inside Laos.

After the interview took place and having that my family and I were also staying inside the

home of a POW-MIA family, I felt that I did not want to antagonize this man, that I did not know or for that matter, no one knew..... and tell him what I truly thought of his information and story. I did not know what his reaction would be, but I gave him some hints during the interview to make him a little nervous to see how he would react and what reaction I would receive. I therefore sent a *read between the lines* message to him on a street level, that I did not quite believe his story. I could see that this had the desired affect that I was hoping it would have.

It wasn't until after the interview ended and my little message to him, that his true colours shone through. The families that were being tested by this young man, were able to listen in on a phone conversation after I had seen "Richard" speaking on the family's mobile house phone, that he did not even ask the family if he could use the phone and or, make a call in the first place. (How rude)! It so happened that he was calling a female person that we gathered was his sister in Florida, of course calling, long distance!

I was able to pick up another phone inside the house and allow both family members to listen to his conversation in which he elaborated that he was driving trucks in Arizona and was heading back to Florida to see her and the rest of the family. The sister, obviously did not believe him and sounded like she was heavily sedated or on drugs of some sort and kept on saying, "*are you lying again*".

From the tone of the conversation that we all overheard, it was obvious that both these poor POW-MIA families were being scammed. After terminating the day's activities, I recommended to the families, to get him out of the house ASAP and send him back to where ever he came from. He had no money, no identification, no working mobile phone etc etc etc. It was best to get him out of the residence of the POW-MIA family as quickly as possible, as I and my wife also, had a bad feeling about this man, who may have had a criminal past, that all of us, may not have known about.

We were able to get him out of the house that day and put him on a Greyhound bus back to Chicago that afternoon without making him aware what we were actually trying to do. We later contacted the FBI office in Phoenix, AZ and notified them about this man's activities and his final destination.

In summary, these are some of the main points that he brought up while being interviewed by myself.

\* He was passing himself off as a medical practitioner / come first aid / herblistic phamist or whatever,,,,,that was performing work in Cambodia, while working for the CIA in trying to infiltrate islamic terror elements inside Cambodia.

(His story also fell very short when my wife who is a Medical Doctor who has been practicing medicine in Venezuela, Spain and Australia for the last 15 years, as a resident surgeon, and who is a pivital ICU doctor in a well respected private hospital in Australia and who has worked in ER extensively. She also saw through the facade that this young man was presenting himself as).

\* “Richard” elaborated that he was brought to the United States from Iraq, because he found evidence of an American MIA pilot from the first Gulf War by the name of (Spicer???) who was being kept as a POW in a underground prison just outside Baghdad. He provided a colourful story on how he became a cleaner at the prison when he was 10 years old and got information to the US military and finally to the CIA, who got himself and his family to the US because he help provide the information on Spicer.

\* He said he was used on CIA missions inside the USA to break into people’s homes and steal documents that they wanted. (Even from the Secretary of States, residence in Philadelphia) mmmmmmmmm, I found it hard to believe!!!!

\* He was later told that he had to go to Cambodia to infiltrate Islamic terror cells working in Cambodia or his family would not get paid money to survive and pay their rent.

\* He then was told that he had to go to Laos on a riverboat and go across the border into Laos from Cambodia to treat some people who he had no idea who they were. He had to travel up the Mekong. He could not provide me any names of places along the way, up to Northern Laos.

\* He also presented photographs of the people’s hands, feet and other body parts, which he said he treated. Most of the photographs were extremely bad quality and of cause, he had excuses for this. However, which was funny, I did recognize one of the cell-phone camera photos!!!! It was of a homeless old back-packer, who I actually saw and bump into inside the city of Phnom Phen, Cambodia when I visited there in May - June 2007 during a work proposal for a future client. (He may have even down loaded these photos from somewhere or someone else).

\* Many of the photos were taken inside a medical facility, but Richard had told me during the interview, that the photos of the POWs were taken inside a cave in Laos. I noticed that there were white ceramic hospital tiles in the background of the photos that are common inside medical facilities in SE Asia. These were just some of the inconsistencies and lies that I was able to establish over the one and half days that I spoke with him.

\*\*\*\*\*

I do not want to make this letter too long, but its very important to me, as someone that has extensive experience in working in SE Asia, in particular, Laos, Vietnam, Cambodia and also Thailand / Burma, that this information is shared and provided to every POW-MIA family.

I believe this young man is possibly dangerous; he may have schizophrenia and may also be able to have a criminal record. I highly recommend that all POW-MIA families have nothing to do with this person and do not contact him or return his letters or calls.

You may ask the question of why we allowed him the time of one and half days to go over his story. Well, I flew and paid for my family and myself half way around the world to listen to what this guy had to say and I wanted to be 100% sure that what he said was either true or not, I gave him the benefit of the doubt!

I have to add, that I detest people such as him and others that I have come across in my past that have tried to use and abuse the POW-MIA issue for their own financial purposes. I will continue to help any POW-MIA family at my own expense to expose and bring to justice anyone that wants to take advantage of the families or of the issue itself.

On a not so happy note, during the departure of *Richard's* stay in the home residence of Mrs. Patty Hopper, this young man stole 3 x books relating to the POW-MIA issue from her home library, some rare and personally autographed books. This surely proves that the man is not only a liar, but a thief also.

The following is a basic description of the young man I interviewed (**Richard**).

REAL NAME: UNKNOWN.

DOB: UNKNOWN – He did not even know exactly!!!!

ID: NONE – UNKNOWN (No passport, No Driver's Lic; No SSN Card, No Student Card,  
NOTHING AT ALL)

SSN: UNKNOWN

Age: Between 25-29

Height: 5' 7

Weight / Build: 170 Pounds – short & Stocky

Hair Color & Style: Black: Short Cropped (USMC) bowl cut.....

Complexion: Olive/dark (Middle East complexion)

Demeanor: Somewhat quiet nature – non-confident – Emphatic liar

Goes by the name of Richard (And, where's his baseball cap to one-side or back-the-front).

Yours sincerely,

Ross Milosevic.
